

3D PLUS

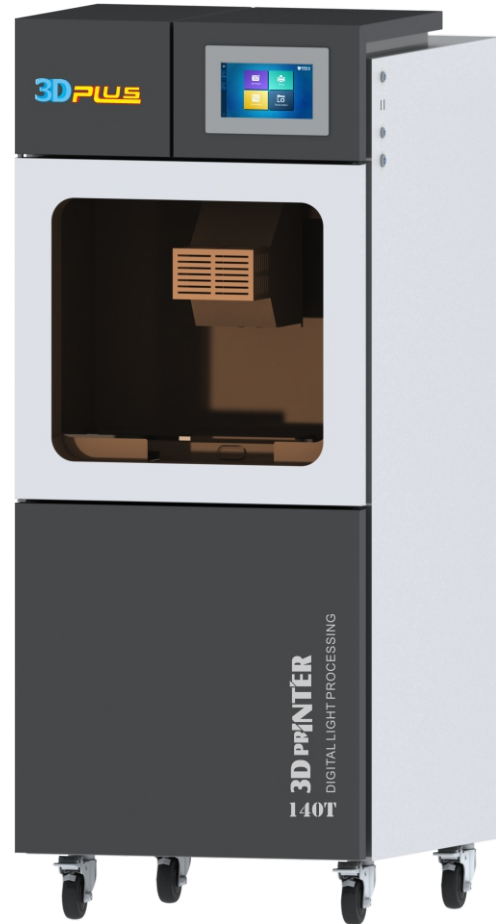

JUST FOR PRODUCTION

Plus4T DLP 3D Printer

Plus 4T is a Top-projecting DLP 3D printer that prints fine 3D style jewelry quickly and stably. 3D Plus focuses on industrial production and enables rapid production in small batches. Its High stability and continuous working ability are recognized by customers.

Plus 4T uses a professional-grade high-resolution projection optical engine with a resolution of 1080p (1920×1080). The high uniformity of light ensures the stable moulding of each position in every moulding layer. With high stability LED UV light source, it ensures the reliable moulding during the printing process. Multiple or large-size models can be printed, and 60 molds can be printed every 1.5 hours.

Digital mask technology is used to ensure the light uniformity of each optical engine. The edge gradient optimization algorithm is adopted to eliminate pixel stripes in the XY direction and step stripes in the Z direction. No film design, No need to consider the material tray loss.

Faster, Bigger, Better, Create the future.

Device Parameters

Brand	3D PLUS	
Model	Plus4T-L140T	
Formation Space	144(X)x81(Y)x75(Z)/mm	
X/Y axis precision	75μm	
Z axis precision	50μm	
Device size	59x68x145cm	
Weight	160kg	
Power Supply	100-120VAC 7A/50/60Hz 200-240VAC 3A/50/60Hz	
Work Environment	20~26°C, humidity < 40% non-condensing	
Light source	LED UV	
Operation system	64 bit Win7 or above system	
Software	Totus Studio	
Format	.stl .slc	
Printing Speed Table		
X/Y resolution (μm)	Layer thickness (μm)	Printing speed (mm/h)
75	50	12-15

Jiangsu Totus Technology Co.,Ltd

ADD: NO. 8, WEST LAKE ROAD, WUJIN HIGH-TECH
INDUSTRIAL DEVELOPMENT ZONE, CHANGZHOU, JIANGSU CHINA
